

PLAN(T) THE FUTURE

of Great Kids Farm

The Farm gathers students and teachers from across the city to learn, share experiences, and cultivate leadership. Summits are a first step in developing school-based garden and nutrition programs.

student summits

Elementary School

Middle School

learning journeys

By making a trip to Great Kids Farm a universal component of the 7th grade curriculum, every City Schools student will gain a meaningful Farm-based experience leading to measurable learning outcomes.

High school internships offer course credits, essential skills, and paid work experience, providing significant personal outcomes for students and meaningful resources for the entire school district.

work-based learning

High School

student wellness support

Through teacher training, seed and seedling giveaways, and resource lending, Great Kids Farm will ensure every school has access to the materials, knowledge, and technical support to enrich school environments with gardens and healthy foods.

Every Grade, Every School

farm-to-cafeteria

By promoting student participation and ownership at every stage of production, the Farm provides sustainable, student-grown produce for school cafeterias, growing to reach students in all grades at every school.

CENTRAL GOAL: every 7th grader, about 5,700 students, will participate in a learning journey at Great Kids Farm.
